Name : Student A

1. What is Photosynthesis? [5M]

Ans: Photosynthesis is the process by which green plants prepare their own food using sunlight carbon dioxide and water in the presence of chlorophyll. Oxygen is released as a by product.

2. Define Respiration. [5M]

Ans: Respiration is the process by which living organisms break down food substances to release energy needed for life processes.

Name : Student A

3. What is Newton's Second Law of Motion? [5M]

Ans: It states that the rate of change of momentum of an object is directly proportional to the applied force and takes place in the direction of the force.

4. What is Force? [5M]

Ans: Force is a push or pull acting on an object which can change the shape direction or speed of the object.

5. What is Ohm's Law? [5M]

Ans: Ohms law states that current through a conductor is directly proportional to the potential difference across its ends when temperature remains constant.

6. What is an Electric Circuit? [5M]

Ans: An electric circuit is a closed conducting path through which electric current flows from a source through components and back.
